	Acti n Summary				

U. S. Patent and Trademark Office PTO-326 (Rev. 9-97)

Part of Paper No._

Art Unit: 2855

- 1. The incorporation of essential material in the specification by reference to a foreign application or patent, or to a publication is improper. Applicant is required to amend the disclosure to include the material incorporated by reference. The amendment must be accompanied by an affidavit or declaration executed by the applicant, or a practitioner representing the applicant, stating that the amendatory material consists of the same material incorporated by reference in the referencing application. See In re Hawkins, 486 F.2d 569, 179 USPQ 157 (CCPA 1973); In re Hawkins, 486 F.2d 579, 179 USPQ 163 (CCPA 1973); and In re Hawkins, 486 F.2d 577, 179 USPQ 167 (CCPA 1973).
- 2. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP \$ 608.01(o). Correction of the following is required: positioning sensor.
- 3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant

Art Unit: 2855

regards as the invention. There are several instances in which recitations lack proper antecedent basis. For example, "the vehicle body" (claim 1); "the left and right seat frames" (claim 3). Next, in claim 1, it is not clear what is meant by "the seat applied to the seat". Claim 3 suffers the same problem. Also in claim 1, "is" on line 2 is not agreeable English. It is not clear what element the applicant is purport to be the positioning sensor. Clarification needed.

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.
- 6. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Blakesley. As best understood, Blakesley teaches a seat weight measuring apparatus (Figs. 1-5) comprising a load sensor 40 installed at one of location at which the seat is fixed to the vehicle body; a positioning sensor and a restraining mechanism (53A, 53B).
- 7. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Oestreicher et al. As best understood,

'Application/Control Number: 09704,839

Page 4

Art Unit: 2855

Oestreicher et al. teaches a seat weight measuring apparatus (Figs. 1-5, 9, 10) comprising a load sensor 14 installed at one of location at which the seat is fixed to the vehicle body; a positioning sensor and a restraining mechanism 44.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Dickens whose telephone number is (703) 305-7047. Any inquiry of a general nature or relating to the status of this application should be directed to the receptionist or the customer service representative whose telephone numbers are (703) 308-0956 or (703) 308-4800 respectively. The fax numbers are (703) 305-3431 and (703) 305-3432.
